```python
1  from random import *
2  temp=randint(1,100)
3  hum=randint(1,100)
4  if(temp>60):
5      print("Alert!..Temperature is high")
6      print("Temperature :",temp)
7  elif(hum>60):
8      print("Alert!..Humidity is high")
9      print("Humidity :",temp)
10 else:
11     print("Temperature and Humidity is
   normal")
```

OUTPUT

Temperature and Humidity is normal
